05 Understanding the Basics of Agile

Let’s start with some expectations

Agile methodology is...

a project management framework built by software developers.

Agile is centered around helping teams get more stuff done by self-organizing their work and continuous improvement.

Agile methodology is...

a project management framework **built by software developers**.

Agile is centered around helping teams get more stuff done by self-organizing their work and continuous improvement.

Agile methodology is...

a project management framework built by software developers.

Agile is centered around helping teams get more stuff done by **self-organizing their work** and continuous improvement.

Agile methodology is...

a project management framework built by software developers.

Agile is centered around helping teams get more stuff done by self-organizing their work and **continuous improvement**.

Agile teams use an agile board

Two types of agile boards

Scrum

Kanban

Two types of agile boards

Scrum

Kanban

Two types of agile boards

Scrum

Kanban

Key difference:

Scrum has sprints.
Kanban does not.

Key difference:

Scrum has **sprints**.
Kanban does not.

What’s a sprint?

A sprint is...

a predetermined amount of time where teams decide what work be done.

Sprint Example

Sprint length _____

Sprint Example

Sprint length 2 WEEKS

Sprint Example

Sprint length 2 WEEKS

DAY 1 Sprint meeting

Sprint Meeting Agenda

- Discuss the *last* sprint
