# KPLABS Course

Splunk 2021 - Beginner to Architect

## Domain 6

# Domain 6 - Security Primer

## Module 1: Access Control

### 1.1 Need of Access Control

i) Extremely Sensitive Data where having access to the system might involve legal risk, consider using an isolated separate Splunk instance for the relevant audience.

ii) When you have sensitive data, then you can restrict access based on Index to the users.

### 1.2 User Authentication

Splunk Enterprise Authentication allows us to create users, add them to roles (groups) and assign permissions to those roles.
